

Cutting Tables

Phillocraft Standard

The Phillocraft standard frame cutting tables (12 gauge C Channel) are available in standard, vacuum or air flotation versions, and in configurations to customer specifications, including

- ** Edge routing for steel tracks
- ** Air hole drill patterns for linear or lateral flow
- ** Two or three leg construction

Phillocraft Heavy Duty

The Phillocraft Heavy Duty cutting tables feature a high load bearing construction, designed to carry modern 1000lb and over capacity spreaders, and incorporate tubular frame (12 gauge 2" x 2") solid steel 1" x 3" top rails to carry the spreader wheels and support the total weight of 2500lbs and over. As with standard tabling, manufacture to customer specification is available.
